

Computing Technology for Math Excellence

Preparing for the Ohio Graduation Test in Mathematics

Strand Resources: Data Analysis and Probability

The following pages are for students. Use them to help you monitor your own test preparation. You can print the entire booklet, or just those pages for benchmarks you want to work on. The resources provided are at CT4ME: http://www.ct4me.net/Ohio_Graduation_Math_Test_Prep_DataStrand.htm

Directions:

1. Identify the benchmark (A-K) below for review in Data Analysis and Probability. Below the benchmark, you will find Web resources for reviewing the concept and practice problems.
2. *Before beginning the Web exercises* for the benchmark you chose, fill in the “K” column: What do you already know about that benchmark? Then in the “W” column: Write what you still want to know.
3. When you have completed using a resource provided, place a check in the box in the first column. This will help you keep track of resources used. Decide if the resource was helpful. Write “yes” or “no” in the last column. Add your comments, if any, about the resource.
4. *After using all the resources* for each benchmark, go to the “L” column and write what you learned. Read your “K” column entries again to see if any of your prior knowledge was inaccurate, and rewrite those statements so that they are correct.
5. Look at the “W” column again, and place a check next to any of your questions that were not answered by using the resources. Be sure to mention those questions in class. Decide how you will find answers to those remaining questions.
6. *When you have completed all of the exercises provided with each benchmark and your K-W-L chart is complete*, reflect on your overall understanding of the benchmark. Be honest with yourself. In the last column circle your belief about your level of mastery: still no or very little understanding (N), some to a great deal of progress (P), I’ve got it!--mastery (M).

Name _____

A. Create, interpret and use graphical displays and statistical measures to describe data; e.g., box-and-whisker plots, histograms, scatterplots, measures of center and variability.		Circle Mastery Level: N P M
What I K now	What I W ANT to know	What I L earned
Check when completed	Resources	Was the Web resource helpful? (yes/no) Comment(s)
	OpenStax CNX: The basics about line graphs in representing data shows how line graphs compare to bar graphs and when to use line graphs. Two self-check questions included.	
	National Center for Education Statistics (for students): Create a Graph	

Name _____

	Statistics Canada: Statistics, Power from Data: Graph Types and create the graph	
	Glencoe Online Study Tools, Mathematics, Algebra 2005, multiple choice practice: <ul style="list-style-type: none">• Box and Whisker Plots • Histograms • Statistics: Scatter Plots and Lines of Fit	
	NCTM E-examples: 7.4: Line of Best Fit: Linear Regression and Least Squares	

Name _____

	<p>Prentice Hall: Using the TI-83 or TI-84: Perform a Linear Regression, Quadratic Regression, or Exponential Regression</p>	
	<p>Utah State University, National Library of Virtual Manipulatives:</p> <ul style="list-style-type: none">• Data Analysis and Probability Manipulatives--select by grade band • Box Plots and Histograms • Scatterplots
